Alexander Marinšek

Backend

PhD student at KU Leuven

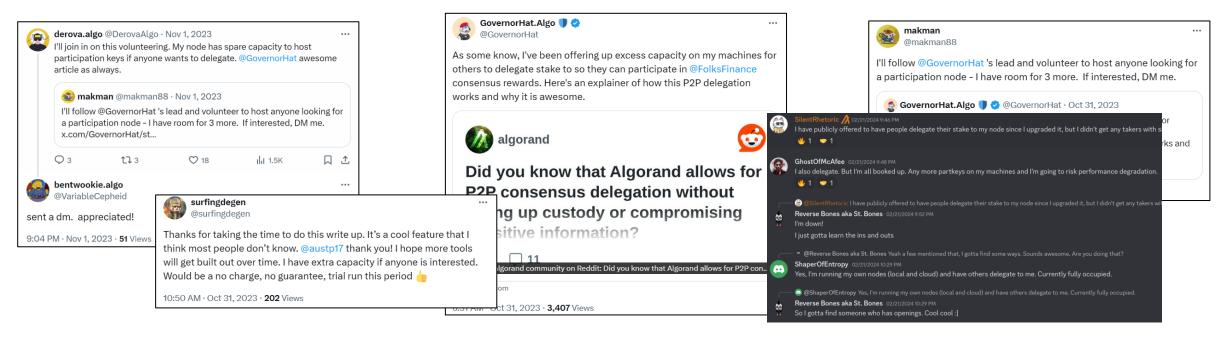

Problem

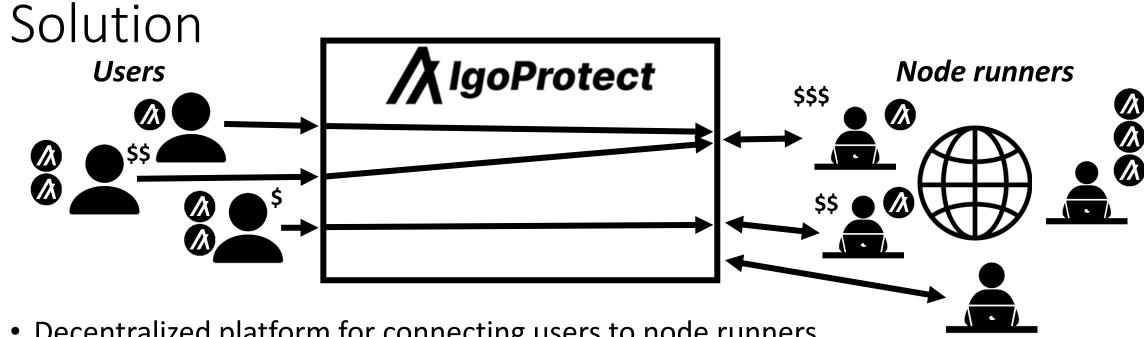

- Blockchains need nodes to run and secure the network
- The more nodes, the more robust and decentralized the network
- The more tokens participate on these nodes, the higher the security
- Barriers for participation:
 - Technical knowledge
 - Time
 - Costs

Problem Users Node runners

• Users are seeking ways to delegate their security budgets to existing node runners

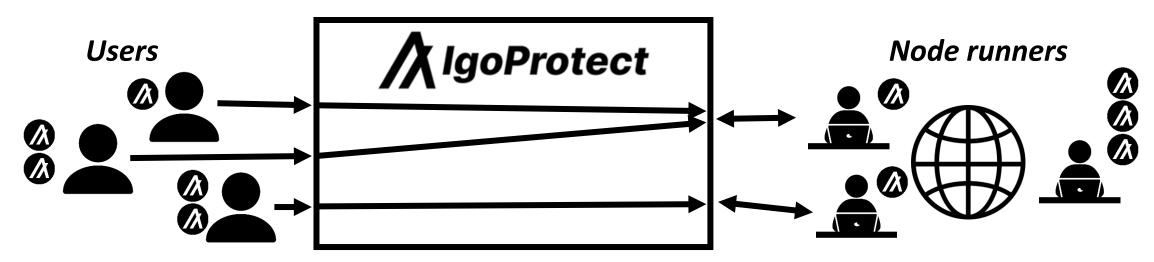

- Decentralized platform for connecting users to node runners
- Create a system with mutual benefits
- Support for becoming a node runner

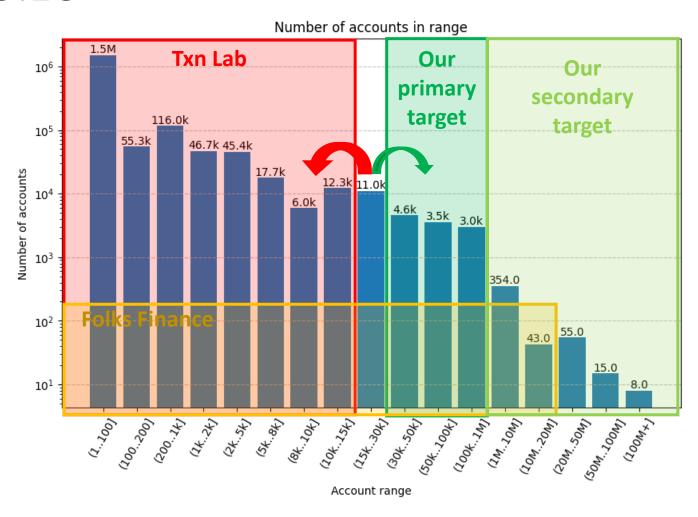

Competition

Who	Individuals	Folks Finance	Txn Lab	 ∕ A IgoProtect
Туре	Self-running	Liquid staking	Pooling	P2P delegation
Decentralization	Highest	Low	Medium	High
User risk	Lowest	Medium	Medium	Low
User effort	High	Low	Low	Low

Funds stay in your wallet! \Rightarrow Use of locked funds (MBR) and direct participation in xGov

Market Size

Target total stake:

Txn Lab: 10%

Folks Finance: 4%

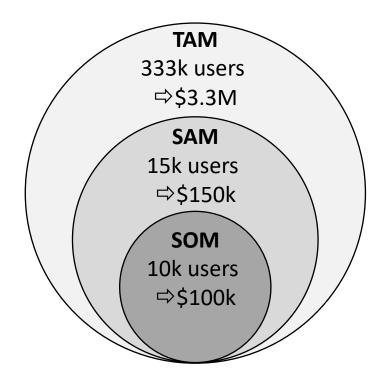

Our primary: 15%

Our secondary: 76%

^{*}Surge in demand for nodes expected due to upcoming incentives (2024 Q4) for accounts with +30k ALGO **Current number of nodes: Bitcoin = 15k - 45k, Ethereum = +7k, Cardano = 2.5k, Algorand = 1.5k

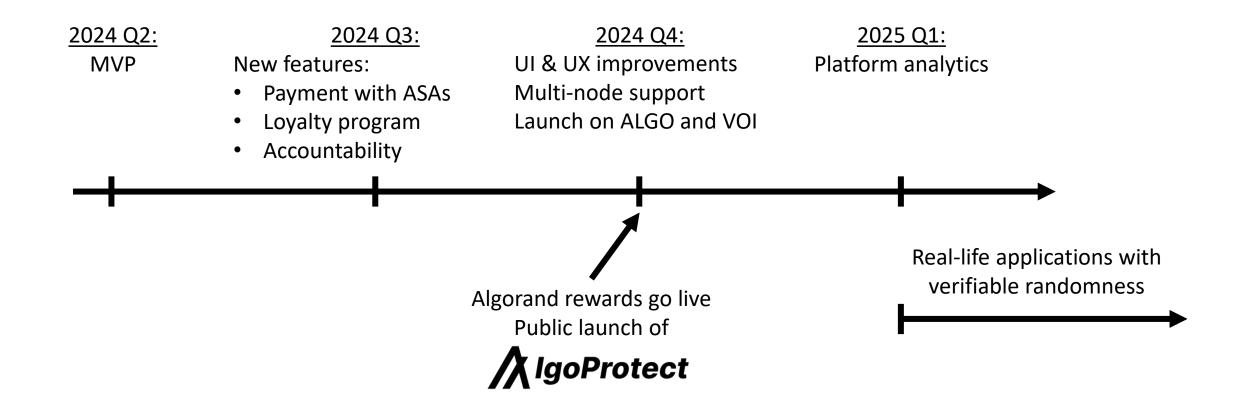

Sustainable Business Model

- Percentage of node runners' fees: e.g. 10%
 - Assumed node costs [per year]: \$240
 - Assumed fee charged by node runners per user [per year]: \$72
 - Partial redistribution to node runners and users based on loyalty points for increased engagement
- Fees from offered node running services
- Protocol rewards from participation with platform's stake

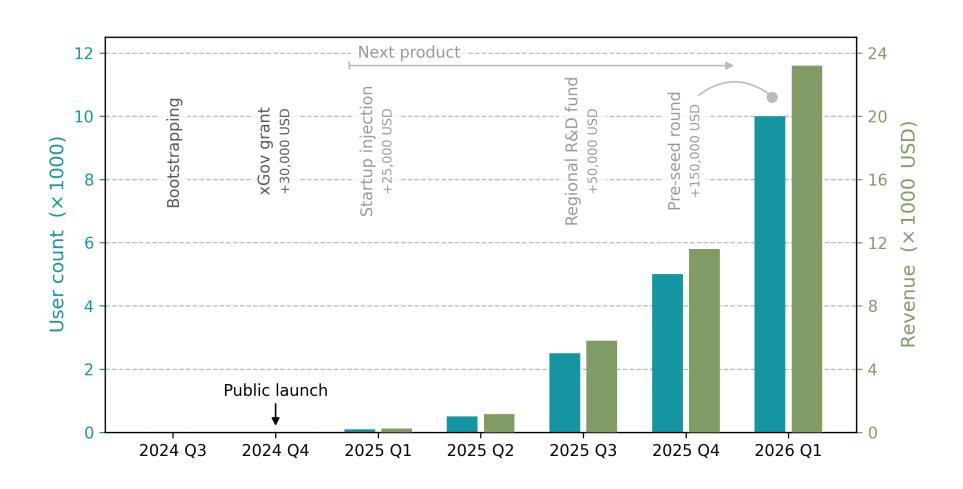

^{*}Surge in demand for nodes expected due to upcoming incentives (2024 Q4) for accounts with +30k ALGO **Current number of nodes: Bitcoin = 15k - 45k, Ethereum = +7k, Cardano = 2.5k, Algorand = 1.5k

Roadmap

Financial and Funding Projection

Ask

- Partnerships to offer node running services to projects' users
- Support in xGov grant program
- Consider us for investments in our following products

Use our product, spread the word about it, and let's protect Algorand together!
